HARVARD REFERENCING (CITE THEM RIGHT): THE BASICS

This guide is intended as a quick introduction to Harvard style referencing based on the 11th edition of *Cite Them Right* by Pears and Shields – see [https://www.citethemrightonline.com/](https://www.citethemrightonline.com/) for further information.

WHY REFERENCE?

Referencing is the method used to ensure that other research influences are recognised within your assignment. Correct referencing helps ensure that you avoid being accused of plagiarism. Most assignments during your time at the University of Wolverhampton will be assessed on the quality of your referencing which will count towards your grade. Referencing also ensures that you can demonstrate which sources you have used and how your ideas build upon the research of others.

Harvard Referencing includes two main parts:
- a citation within the text of your assignment
- a list of references at the end of your assignment

REFERENCING IN YOUR TEXT - CITATIONS

When you summarise, refer to, or quote from an author’s work in your document, you need to acknowledge your source in the text. This is called an ‘in-text citation’. When using Harvard, you do this by putting the author’s name and publication year. If the name of the author appears naturally in your sentence, only the year should be in brackets. Cite Them Right advises including page numbers for direct quotations and when paraphrasing, although page numbers would not be required when summarising.
