

School of Computer Science and Mathematics Recruitment Fair 2019

Thursday 14th November • 12pm - 3pm • Alan Turing Building

Technology Showcase

Our aim is to connect students to technology businesses that are regionally, nationally or internationally known, whilst giving companies a place to showcase their technology.

We see our students as the future of technology, and this Fair is planned to encourage them to start thinking about their future after University, starting with sandwich placements. With the growth of technology, there is a great need for workers to have technical experience and knowledge to put this into practice, this has increased the importance of industrial placements and why we find it highly important for students to complete a year long placement after their second year of University. Evidence has found students who complete a placement are more likely to secure a graduate opportunity after University.

Areas of Expertise

Our students are currently studying:

- Computer Science
- Information Technology
- Computing
- Cyber Security
- Software Engineering
- Computer Networking
- Games Development
- Mathematics
- Statistics
- And more!

BOOK NOW

The event will take place at our City Campus and is FREE of charge to all exhibitors. We hope you would be able to offer both **placement** and **graduate** opportunities.

Introduction

The School of Computer Science & Mathematics at the University of Wolverhampton are organising a FREE recruitment fair. We invite you to promote your business, showcase your products and talk with our students about opportunities. Our School of Computer Science & Mathematics is home to state of the art technologies such as cyber laboratories, as well as student industry links such as the specialist programming team.
